## Early Identification and Early interventions for Special Learning Needs

*What can i do if the child is not learning?*

Have you come across children who seem behind their peers academically and when observed carefully, some of these children could also have problems making friends, articulating their thoughts or taking part in physical activities?

Flexible | Innovative | Affordable

## PDC Overview

This module is for early years educators in **mainstream schools** who are interested in helping children learn with **special learning needs**. The module provides an **introduction** to early identification and intervention among children with developmental delays. It will provide insights into how being alert about **developmental milestones** can help parents and teachers to take **appropriate action** to expedite learning. You will also become familiar with different areas of child development and the kinds of **early interventions** that can be done with a child who is reaching milestones slowly. You will learn about planning for children with special needs and communication with parents.

### How does a PDC work?

**Online**

**One month duration**

**Highly qualified  
facilitators**

**No Exams  
Authentic workplace  
assessments**
